

Summer Haven

Square Footage:

Main Level: 3,354 square feet

Upper Level: 2,372 square feet

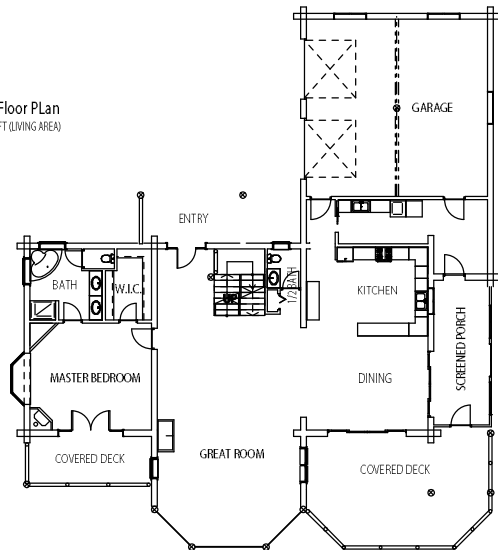

Total: 5,726 square feet

The bold look of our Summer Haven, with its reticulated prow, combines a strong look with an enormous expanse of glass to capture all that nature wants to show you. You know that one spot on your land? This Caribou design will not only capture that view but it will wrap that view right around you. This house uses all the space and still gives you a big open feeling. Standing in the loft you're actually looking through a log truss to the glass in front. The first floor Master Suite and open floorplan lets you live on one level while everyone upstairs is spread out nicely. Outdoor spaces abound; a screened porch off the kitchen/dining area let's you escape for a break.

Options:

What more can you add to this home? Maybe some character wood or some carvings. We have artists available and ready for your carving requests.
