

Wenatchee

Square Footage:

Main Level: 2200 square feet

Upper Level: 554 square feet

Total: 2754 square feet

The Wenatchee is our most popular plan. We've used this design as a starting point for so many people, and yet, we build the floorplan a little differently every time. In this version of Caribou's Wenatchee, patio doors are strategically placed off the bedroom areas so you can gain easy, private access to the semi-private deck off the Master. This plan will pamper you with the well appointed Master Bath. A Simple, open kitchen keeps the cook involved in the family action. There is plenty of room for guests if the kids sack out in the sleeping loft. You know they'll like that idea. The walk out lower level and elevated deck depends on your piece of land.

Options:

Change the windows, change the patio doors, increase the size of the kitchen. You can change just about anything you need to. We'll help.
